## POSITIVELY MAD RESOURCE PACK

This pack consists of seven units, each focusing on a different life process. The units are designed to include access to the multiple intelligences, incorporating as many accelerated learning methods as possible. Provision for circle time, review and reflection has been made, as has an attempt to link critical thinking skills and the scientific process.

### **Unit One**

Moving through the verbal/linguistic intelligence

This unit explores the different ways in which animals move

### **Unit Two**

Respiration and the body-kinesthetic intelligence

This unit explores the different ways in which living things RESPIRE

### **Unit Three**

Sensitive to the interpersonal intelligence

This unit explores the different ways in which animals are sensitive

### **Unit Four**

Excretion and the musical intelligence

This unit explores the different ways in which living things excrete

### **Unit Five**

Reproduction through the visual-spatial intelligence

This unit explores plant reproduction

### **Unit Six**

Investigating growth through the logical-mathematical intelligence

This unit explores the different ways in which living things grow

### **Unit Seven**

Investigating nutrition through the intrapersonal intelligence

This unit explores the different ways in which living things eat and drink – focusing on human diet.
